SUMMARY

Computer Science and Engineering graduate with hands-on experience developing practical software solutions through academic and personal projects. Strong problem-solving mindset with an interest in building reliable, user-focused applications and learning new technologies. Seeking an entry-level Software Engineer / Full-Stack Developer role to apply technical knowledge and contribute to real-world projects.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript

Web Technologies: React.js, Node.js, Express.js, HTML, CSS

Databases & Tools: PostgreSQL, MySQL, Git, GitHub, Blender, Unity

Backend & Development: RESTful APIs, JWT, Authentication, API Integration

PROJECTS

Lifecycle Product Management Platform | [GitHub](#)

July 2026 – Aug 2026

Technologies: React, Node.js, Express.js, PostgreSQL

- Architected a Digital Product Passport unifying invoices, warranty cards, service records, repair documents, and product details into a single platform.
- Automated product lifecycle tracking for warranty, AMC, and return periods, with expiry alerts and chronological event timelines.
- Built ownership cost analytics and a Resale Passport feature combining purchase, repair, and service history to support resale decisions.

Drive Hub – Car Rental Booking System | [GitHub](#)

Mar 2026 – June 2026

Technologies: React.js, Node.js, Express.js, PostgreSQL, Razorpay

- Developed a full-stack car rental and booking application with RESTful APIs for car listing, availability, booking, and rental management.
- Implemented date-based booking logic, automated rental price calculation, booking history, and cancellation workflows.
- Integrated Razorpay payment gateway supporting Card, UPI, and Cash with secure payment verification, and built responsive Customer and Admin dashboards with role-based access control.

TRAINING & CERTIFICATIONS

Data Structures and Algorithms: Self-Paced | Summer Training

May 2024 – July 2024

- Practiced arrays, linked lists, trees, graphs, and sorting/searching techniques; built solutions using stacks, queues, recursion, and dynamic programming in Java.
- Applied time complexity analysis and optimization to independently solve **100+ coding problems** across varying difficulty levels.

Certifications:

- SAP Certified – Data Analyst, SAP Analytics Cloud (Feb 2026)
- MERN Stack, Cipher Schools (Jul 2025)
- Cloud Computing, NPTEL (Nov 2024)
- Ethical Hacking Essentials (EHE) (Jun 2024)

EDUCATION

B.Tech, Computer Science and Engineering

Aug 2022 – Jul 2026

Lovely Professional University, Punjab, India

Intermediate (Class XII)

May 2019 – Sep 2021

Holy Cross School, Madhepura, Bihar

ACHIEVEMENTS

- **5-Star Badge, Python & C++ – HackerRank (2024):** Earned 5-star ratings for problem-solving in both Python and C++.
- **Community Development Project (Jun 2023):** Certificate for participation in a project supporting underprivileged communities.
